Native

Selected Projects

Winamp

Reconstruction of the iconic Winamp audio player.
This audio player connects to the Soundcloud API and uses it to stream audio. The user can view the music details, create a custom playlist, and share what they are listening to on social media.
Technologies used: JavaScript, React.js, Redux, Node.js/Express, Postgres SQL.
This Project was deployed online

Social Network

The Social Network is a web application comparable to Facebook or LinkedIn.
It includes login and registration, password recovery, live chat and wall posts.
Technologies used: React.js, Redux, Socket.io, Node.js/Express, SQL.

Petition

This online petition stores users' digital autographs and collects them as a means to stop German bureau's from using paper letters to communicate.
Technologies used: JavaScript, SQL, Handlbars.js, Node.js/Express.
This project was deployed online.

Education
